## EDUCATION

### University of Waterloo

*Bachelor of Applied Science, Computer Engineering*

Sept. 2019 - Apr 2024

Waterloo, ON

## EXPERIENCE

### Indigo Books & Music

*Mobile Developer (Kiosk Lead)*

April 2024 - Present

Toronto, ON

- Continuing to lead code development and production for Kiosk
- Identified bugs relating to UI performance and **reduced memory usage by 30%**

*Mobile Developer Intern (Kiosk)*

Sept. 2023 - Dec. 2023

- Independently architected in-store search Kiosk software with Android Compose for use in **over 200 stores across Canada**
- Worked as sole developer under a tight 2-month timeline **overseeing the entire software development lifecycle** from conception to deployment
- Created internal standards and processes for Kiosk programming, release, and DevOps
- Nominated for the University of Waterloo's prestigious **Co-op of The Year Award**

### JAM3 / Media.Monks

*Developer Intern*

Jan. 2023 - April 2023

Toronto, ON

- Designed components and implemented API calls with an experienced team in React for Shopify's Entrepreneurship Index webpage
- Created a client site using **Next.js and Three.js** to research usability and performance, which was used to create the company-wide boilerplate

### 1Password

*Developer Intern (Billing)*

Jan. 2022 - April 2022

Toronto, ON

- Worked with senior developers to re-architect billing process into a single payment window facing **\$120M+ in annual sales**
- Assisted in creating RESTful APIs that connect front-end React code to back-end Go code to **service over 90,000 business customers' billing requests**

## PROJECTS

### Who? WAT? Where? (FYDP Project) | *React Native, Three.js*

May 2023 - April 2024

- Developed a React Native application to serve as an all-in-one student accessory, offering door-to-door navigation, campus information, and custom user recommendations
- Designed and implemented an interactive 360° panorama "Street View" component with Three.js, connected back-end and front-end code, and created user facing components

### MunchBox (ECE 452) | *Kotlin, Jetpack Compose, Firebase*

May 2023 - Aug. 2023

- Worked in a team of 6 to create a "tiffin" food ordering application using Kotlin and Android Compose
- Added image upload functionality, back-end API connections, and developed front-end components

## TECHNICAL SKILLS

**Languages:** Kotlin, JavaScript, Python, Go, TypeScript, C/C++, HTML/CSS,
